General

- Updated to work with Opera II V6.82.xx

Version 6.81.02 – 16th July 2010

Copy Company Utility

- Added Demo mode – restrictions are that you can only copy into company Z, you can only copy Sales, Purchase, Nominal, Stock and System and only the even records are copied from the header files
- Couple of minor fixes

Version 6.81.01 – 21st June 2010

New Products

- Auto Dormant Customers
- Auto Dormant Suppliers

General

- Sorted issue with demo mode flagged in old cks*.sys files from previous versions

- Added visual progress bar to SL Auto On-Stop, Stock Zeroise and Stock Archive routines

SOP Consolidate Invoices

- Modified to ignore credit notes progressed from invoices

Version 6.81.00 – 24th May 2010

General

- Updated to work with Opera II V6.8x

Copy Company Utility

- Added Document Management Module

Opera2cheCK

- Added Document Management Module

Version 6.80.07 – 20th May 2010

General

- Various internal client changes

Copy Company Utility

- Fixed: Was not updating source company in P32 tables
- Fixed: IDTAB and AUDLOG tables were not being copied

Version 6.80.06 – 4th May 2010

General

- Various internal client changes

CK Postcode

- Couple of minor fixes and tidy up to Postcode page on activation form

CK Garage / CK Car Hire

- Couple of minor fixes and speed increases

Stock Zeroise

- Stock adjustment transaction was picking up sell price, not cost price

Version 6.80.05 – 6th April 2010

General

- Fixed alignment of fields in SOP Processing header form
- Various internal client changes

CK Garage / CK Car Hire

- Fixed Garage archiving
- Modules can now work independently of each other
- Various other fixes / code tidy / slight improvements

CK Route Cards

- Sales code mandatory against Finish
- Finish code mandatory against Parts
- Only non stocked profiles can be used against Parts

Version 6.80.04 – Internal Release

Version 6.80.03 – 22nd March 2010

General

- Further speed improvements loading Opera II
- Various internal client changes

Copy Company Utility

- Added Fixed Assets module to list of modules to copy

Version 6.80.02 – 14th March 2010

General

- Added 2 new options to Update Data Structures:
 - Create Opera2cheCK Definitions
 - Merge CKS data into Reporter
- Fixed bug removing products from CK Activation
- Further speed improvements loading Opera II

Opera2cheCK

- Fixed intermittent invalid licence message
- Various fixes and improvements

CKRe-code

- Minor changes to improve speed slightly

CKDelete

- Minor changes to improve speed slightly
- (Nominal) Added option to update Matrix Reports (this was done as standard but was slowing things down on large nominal data)

Copy Company Utility

- Added option to rollback changes on failure. This was standard behaviour but was taking a long time to committing changes at the final update. If this option is selected then protects data integrity but increases the runtime (system will appear to freeze when updating at end). If this option is not selected then will improve speed but will partially update data if fails at any point.
- Fixed issue with NACNT copy

Nominal Account Creation

- Fixed File in Use Error

Version 6.80.01 – 26th February 2010

- Internal changes
- Added reminder to install CKS client after Product Library is installed

Version 6.80.00 – 22nd February 2010

- Updated to work with Opera II V6.8x
- New CKS Product Library client install
- New Desktop Alerts engine – This is used by some CKS messages but will be used more extensively in our upcoming product CK Alerts
- New Email Error Logs
- Speed improvements loading Opera II
- Fixed launching of the Visual FoxPro command prompt from CK Activation – Action button
- Fixed minor issue with Opera2cheCK update in UDS

Please note that the Desktop Alerts engine and Email Error Logs are optionally installed as part of the CKS client install
